Presenting encryption algorithms with diverse characteristics, **Image Encryption: A Communication Perspective** examines image encryption algorithms for the purpose of secure wireless communication. It considers two directions for image encryption: permutation-based approaches and substitution-based approaches.

Covering the spectrum of image encryption principles and techniques, the book compares image encryption with permutation- and diffusion-based approaches. It explores number theory-based encryption algorithms such as the Data Encryption Standard, the Advanced Encryption Standard, and the RC6 algorithms. It not only details the strength of various encryption algorithms, but also describes their ability to work within the limitations of wireless communication systems.

Since some ciphers were not designed for image encryption, the book explains how to modify these ciphers to work for image encryption. It also provides instruction on how to search for other approaches suitable for this task. To make this work comprehensive, the authors explore communication concepts concentrating on the orthogonal frequency division multiplexing (OFDM) system and present a simplified model for the OFDM communication system with its different implementations.

Complete with simulation experiments and MATLAB® codes for most of the simulation experiments, this book will help you gain the understanding required to select the encryption method that best fulfills your application requirements.

From reader reviews:

Brenda Blackmer:

Now a day folks who Living in the era just where everything reachable by connect to the internet and the resources inside can be true or not require people to be aware of each data they get. How people have to be smart in having any information nowadays? Of course the answer then is reading a book. Reading through a book can help persons out of this uncertainty Information specially this Image Encryption: A Communication Perspective book since this book offers you rich data and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you probably know this.

Edward Yung:

Information is provisions for folks to get better life, information these days can get by anyone on everywhere. The information can be a know-how or any news even an issue. What people must be consider whenever those information which is inside the former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you get the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Image Encryption: A Communication Perspective as the daily resource information.

Chris Moore:

A lot of book has printed but it takes a different approach. You can get it by net on social media. You can choose the very best book for you, science, witty, novel, or whatever by simply searching from it. It is known as of book Image Encryption: A Communication Perspective. You'll be able to your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you actually happier to read. It is most crucial that, you must aware about reserve. It can bring you from one spot to other place.

Phillip Martin:

A lot of people said that they feel weary when they reading a book. They are directly felt that when they get a half regions of the book. You can choose typically the book Image Encryption: A Communication Perspective to make your own personal reading is interesting. Your own personal skill of reading proficiency is developing when you including reading. Try to choose very simple book to make you enjoy to read it and mingle the opinion about book and reading through especially. It is to be initially opinion for you to like to wide open a book and learn it. Beside that the publication Image Encryption: A Communication Perspective can to be your new friend when you're really feel alone and confuse using what must you're doing of the time.
