Intelligent Vision Systems for Industry

Bruce G. Batchelor, Paul F. Whelan

Intelligent Vision Systems for Industry Bruce G. Batchelor, Paul F. Whelan

The application of intelligent imaging techniques to industrial vision problems is an evolving aspect of current machine vision research. Machine vision is a relatively new technology, more concerned with systems engineering than with computer science, and with much to offer the manufacturing industry in terms of improving efficiency, safety and product quality. Beginning with an introductory chapter on the basic concepts, the authors develop these ideas to describe intelligent imaging techniques for use in a new generation of industrial imaging systems. Sections cover the application of AI languages such as Prolog, the use of multi-media interfaces and multi-processor systems, external device control, and colour recognition. The text concludes with a discussion of several case studies that illustrate how intelligent machine vision techniques can be used in industrial applications.

From reader reviews:

Charlie Bowers:

Book is written, printed, or illustrated for everything. You can understand everything you want by a book. Book has a different type. As you may know that book is important point to bring us around the world. Beside that you can your reading ability was fluently. A publication Intelligent Vision Systems for Industry will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or acceptable book with you?

Paul Eastman:

What do you about book? It is not important along with you? Or just adding material when you really need something to explain what your own problem? How about your time? Or are you busy individual? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everyone has many questions above. They have to answer that question since just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this particular Intelligent Vision Systems for Industry to read.

Jack Johnson:

Spent a free time for you to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they doing activity like watching television, gonna beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to consider look for book, may be the guide untitled Intelligent Vision Systems for Industry can be excellent book to read. May be it may be best activity to you.

Brian Paige:

Beside this specific Intelligent Vision Systems for Industry in your phone, it could give you a way to get more close to the new knowledge or data. The information and the knowledge you will got here is fresh from the oven so don't end up being worry if you feel like an aged people live in narrow village. It is good thing to have Intelligent Vision Systems for Industry because this book offers to you personally readable information. Do you often have book but you do not get what it's about. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss that? Find this book along with read it from right now!
