Thermochemical Conversion of Biomass for the Production of Energy and Chemicals

Anthony Dufour

Thermochemical Conversion of Biomass for the Production of Energy and Chemicals Anthony Dufour

This book highlights the processes of biomass thermochemical conversion, covering topics from combustion and gasification, to pyrolysis and liquefaction.

Heat, power, biofuels and green chemicals can all be produced by these thermochemical processes. The different scales of investigation are presented: from the bioenergy chains, to the reactors and molecular mechanisms.

The author uses current research and data to present bioenergy chains from forest to final use, including the biomass supply chains, as well as the life cycle assessment of different process chains.

Biomass conversion reactors are also presented, detailing their technologies for combustion, gasification and syngas up-grading systems, pyrolysis and bio-oil upgrading.

The physical-chemical mechanisms occurring in all these reactors are presented highlighting the main pathways for gas, char and bio-oil formation from biomass.

This book offers an overview of biomass valorization for students, engineers or developers in chemistry, chemical, environmental or mechanical engineering.

From reader reviews:

Lawrence Rowe:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a guide. Beside you can solve your problem; you can add your knowledge by the publication entitled Thermochemical Conversion of Biomass for the Production of Energy and Chemicals. Try to face the book Thermochemical Conversion of Biomass for the Production of Energy and Chemicals as your pal. It means that it can being your friend when you really feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated to suit your needs. The book makes you considerably more confidence because you can know anything by the book. So , we need to make new experience along with knowledge with this book.

Mark Vandyke:

Book is to be different for each grade. Book for children until finally adult are different content. As we know that book is very important for us. The book Thermochemical Conversion of Biomass for the Production of Energy and Chemicals was making you to know about other information and of course you can take more information. It is very advantages for you. The publication Thermochemical Conversion of Biomass for the Production of Energy and Chemicals is not only giving you far more new information but also being your friend when you really feel bored. You can spend your current spend time to read your e-book. Try to make relationship while using book Thermochemical Conversion of Biomass for the Production of Energy and Chemicals. You never sense lose out for everything should you read some books.

James Robbins:

This book untitled Thermochemical Conversion of Biomass for the Production of Energy and Chemicals to be one of several books that best seller in this year, here is because when you read this book you can get a lot of benefit in it. You will easily to buy this particular book in the book retail store or you can order it by way of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Cell phone. So there is no reason for your requirements to past this guide from your list.

Harry Blalock:

That reserve can make you to feel relax. This book Thermochemical Conversion of Biomass for the Production of Energy and Chemicals was colourful and of course has pictures around. As we know that book Thermochemical Conversion of Biomass for the Production of Energy and Chemicals has many kinds or category. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore not at all of book are generally make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.
