Believe and Grow Smart: 7 Fun, Easy-to-Follow, Classroom Tested, Reading Strategies to Help Your Child Improve Over a Grade Level in Reading Noel Morales M.Ed.

Welcome to Believe and Grow Smart. This represents 18 years of hard work, experience and the efforts of my incredible team, students and their families I have served under many capacities, teachers I have supported and clients. Maybe you're one of them! Usually, clients come to me to seek help because their children are behind in one or more subject areas and they need help now. Their children have run into personal challenges at a very young age about their beliefs. They have run into limiting beliefs and have created obstacles in their own minds that they feel are insurmountable. They have recurring thoughts in their mind that they are dumb. That they can't read. That they are not good at math. Most of these thoughts are continuously playing in their minds all day long in school and have a significant impact on their learning. Let me ask you some questions that I ask my clients. If you could find a way to help your children build their academic self-confidence right now, this month, would you do it? How about improving their reading ability? Math ability? Writing ability? Maybe improving their reading, writing or math skills a grade level plus? Yes, yes, yes, yes and yes. Right? I mean of course. Who would not want their child to improve? I'm here to tell you that it is not only possible to do exactly that, but that it definitely will happen if you are committed to your child's progress. I am not boasting or bragging. I have been a part of helping thousands of students and their families in grades K-12, Special Education and adults who returned to school to work on the General Education Development (GED) test, High School Diploma or to better their lives and the lives of their families by learning English. As you can see these students and their families comprise different ages and backgrounds. Families just like yours and students just like your children. The ideas, principles and strategies of this book are designed to help you leverage my experience and know how. To help your children (possibly you too) expand and challenge their beliefs and allow them to have a brighter and fuller future. I want to tell you now that a single idea, when it is part of our beliefs, will change the course of life from the moment it is accepted. Doors are opened or closed. Futures are defined or lost. Be very clear about this: I am not here to solve everything. I'm here to guide you so that you can help your children improve. I am here to help you raise the bar for them in a genuine, caring and compassionate manner. I am here to help them raise the bar for themselves and to extinguish the limiting beliefs that they have erroneously instilled in their minds. This is a book that's packed with content and lots of ideas. It's a WHAT book. My intention for you and the purpose of this book is to show you the most powerful ways and teaching strategies that can help your child improve, regain their academic self-confidence and to build resiliency and grit that they can translate into other areas of their lives. We have a how to system available that includes everything you need to execute what you read in these pages. This book is intended for parents that WILL take action and not let one more day go by where their children are struggling to read. You'll see there's LOTS of ideas that you can use to help children gain confidence and reach their potential. If you're the type who's looking for a free, quick, effortless and easy way, this is not the book for you.

Thelma Atkins:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some guide, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the educator want, like asked to the library. They go to generally there but

nothing reading really. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Believe and Grow Smart: 7 Fun, Easy-to-Follow, Classroom Tested, Reading Strategies to Help Your Child Improve Over a Grade Level in Reading can make you experience more interested to read.
