## **Jupiter Meets Uranus** Anne Whitaker

Jupiter and Uranus meet every 14 years. When they do, revolution and innovation join forces with restless exploration and the quest for knowledge. The result is always exciting, educational and unpredictable. Or is it? Anne Whitaker, never one to take anything at its face value, decided late in 1996 that she would observe the effects of this approaching planetary event and investigate whether it lived up to its reputation according to the textbooks. Her method was straightforward: watch world events around the time of the conjunction, and during the rest of 1997; find some volunteers with the 5 Aquarius 55 Hot Spot highlighted by in their natal horoscope; collect their stories during the year of the conjunction; and determine whether the "Jupiter-Uranus effect" could be detected in their lives. As Ken Gillman writes in the foreword, "This is a study of real-life astrology." Nine of the original 17 volunteers stayed with the study throughout. Their disrupted, exciting, turbulent life stories form the core of this vivid exploration of the interface between planetary activity and human life, during a period in which the startling announcement of the birth of Dolly the Sheep in February 1997 indicated that advances in cloning and genetic engineering were taking us on a voyage never before undertaken by humanity. This highly original book, written in a pacy and accessible style, will be of particular interest to research-minded students. It will also appeal to astrologers looking for specific evidence that the personal and collective lives of humankind respond in the same core way to the great music of the spheres, played throughout space and time by the planets in their cycles.
