Structure of Dynamical Systems: A Symplectic View of **Physics (Progress in Mathematics)**

J.M. Souriau

Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics) J.M. Souriau

The aim of the book is to treat all three basic theories of physics, namely, classical mechanics, statistical mechanics, and quantum mechanics from the same perspective, that of symplectic geometry, thus showing the unifying power of the symplectic geometric approach. Reading this book will give the reader a deep understanding of the interrelationships between the three basic theories of physics. This book is addressed to graduate students and researchers in mathematics and physics who are interested in mathematical and theoretical physics, symplectic geometry, mechanics, and (geometric) quantization.

From reader reviews:

Anna Maples:

Have you spare time for just a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the particular Mall. How about open or maybe read a book eligible Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics)? Maybe it is to be best activity for you. You already know beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

Linda Young:

What do you regarding book? It is not important along? Or just adding material if you want something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They must answer that question because just their can do which. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics) to read.

Dora Dickey:

Reading a publication can be one of a lot of pastime that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new info. When you read a guide you will get new information simply because book is one of various ways to share the information or even their idea. Second, studying a book will make an individual more imaginative. When you examining a book especially fictional book the author will bring someone to imagine the story how the people do it anything. Third, you can share your knowledge to some others. When you read this Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics), you could tells your family, friends and also soon about yours book. Your knowledge can inspire the others, make them reading a book.

Lena Stubbs:

A lot of people said that they feel bored stiff when they reading a guide. They are directly felt the item when they get a half portions of the book. You can choose the particular book Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics) to make your reading is interesting. Your own skill of reading proficiency is developing when you just like reading. Try to choose straightforward book to make you enjoy to read it and mingle the sensation about book and reading especially. It is to be initial opinion for you to like to wide open a book and examine it. Beside that the book Structure of Dynamical Systems: A Symplectic View of Physics (Progress in Mathematics) can to be your brand-new friend when you're

experience alone and confuse using what must you're doing of their time.
