Anthony F. Rotatori

The Broad Autism Phenotype (Advances in Special Education) Anthony F. Rotatori

This proposed volume will provide in-depth coverage about a construct known as the broad autism phenotype (BAP). The BAP encompasses biological, cognitive, emotional, behavioral, and interpersonal characteristics resembling those found on the autism spectrum, although more subtle than what is evident among individuals who meet formal criteria for an autism spectrum diagnosis. Initially identified in 1994, the BAP has been receiving increased attention due to the recognition of autism as a spectrum of disorders that vary in symptoms and severity.
