**The Compact NASA Atlas of the Solar System** Ronald Greeley, Raymond Batson

Without sacrificing any of the detail or breadth of the full-size edition, the essential reference source for maps of every planet, moon, or small body investigated by NASA missions is now available in a convenient, portable format. Featuring over 150 maps, 214 color illustrations and a gazetteer that lists the names of all features officially approved by the International Astronomical Union, The Compact NASA Atlas of the Solar System includes the full range of information gathered from NASA missions throughout the Solar System. Compiled by the US Geological Survey, this atlas includes: -Geological maps -Reference maps -Shaded relief maps -Synthetic aperture radar mosaics -Color photo-mosaics that present the features of planets and their satellites This 'road map' of the solar system is the definitive guide for planetary science and should be part of every cartographers and astronomer's collection. Ronald Greeley is a Regent Professor in the Department of Geological Sciences at Arizona State University. He is a team member of the Galileo mission to Jupiter and of the Mars Pathfinder lander. Greeley is currently a co-investigator for the European Mars Express mission. Raymond Batson spent his 35-year career with the United States Geological Survey. He has worked in terrestrial mapping and in lunar and planetary mapping. Batson served as co-investigator or team member on most NASA planetary missions, including the Apollo lunar lander missions, the Mariner Mars and Venus/Mercury mapping missions, the Viking 1 and 2 Mars mapping missions, the Voyager missions to the outer planets, and the Magellan Venus radar mapping mission.
